

Structured Home Media

Home Owners

Your home gateway
for high-speed Internet
access, whole house
entertainment and home
office connectivity.

When you invest in a new house, the result should be a home that is not only attractive and comfortable, but one that also keeps pace with your family's expanding technology needs.

Choose the Structured Home Media network solution that matches your budget and lifestyle and we'll put the most advanced communications, entertainment, security and automation technologies at your fingertips. You'll not only enjoy all the benefits of today's most advanced home wiring and networking technology, but your home will be ready for tomorrow's technology advances without rewiring. You'll also add substantial resale value to your home.

Structure Home Media integrates advanced technologies into simple, affordable, upgradeable solutions that inform, entertain, assist, and protect you.

Structured Home Media offers unmatched quality and an unparalleled variety of home network solutions. You and your family will enjoy the very latest technologies including home theater with surround sound, multi-room video distribution, whole-house audio, security camera monitoring, shared high-speed internet access, multi-line telephone, central vacuum and more.

To learn more, contact Structured Home Media directly or visit us on the Web at www.StructuredHomeMedia.com.

Communications

Whole-House High-Speed Internet

Your home network gives you always-on, instant accessibility to the Internet via high-speed Internet services such as DSL, ISDN, cable, or satellite. Simply plug into an available data outlet anywhere in your home.

Home Office

Your home office can include high-speed data wiring for voice and data communications. Innovative plug & play designs distribute telephone lines and data signals throughout your home, and allow you to add or change locations of phones, fax machines and modems without rewiring.

Home Computer Networking

With this popular option, your home will be wired to allow your computers to communicate and share files, printers, fax machines, scanners and modems. Works great for multi-user computer games too!

Entertainment

DBS Satellite Television

Distribute a satellite dish signal to separate receivers and television locations through a single coaxial cable. Now you can view satellite TV from any room in the house.

Multi-Room Video Distribution

Create your own in-home television channels by modulating and distributing signals from up to three different video sources such as security cameras, DVD or VCR

players, HDTV, satellite or cable to televisions throughout your home. Now every room can be an extension of your entertainment center!

Whole-House Audio

Play music to suit your mood throughout your entire home. Optional in-wall speakers distribute a high-quality audio signal to 8 pairs of stereo speakers, or to 16 mono locations, or to any combination of your choice.

Home Theater

Enhance your entertainment experience with the awesome sound of five high-quality speakers that come ready to connect to your surround sound-capable entertainment system.

Security and Automation

In-Home Camera Monitoring

Home automation systems connect in-home cameras to any television in the house, so you can keep an eye on the baby in the nursery, monitor the swimming pool or see visitors at the front door.

Integrated Security System

Integrated security controller and accessories provide comprehensive home security functions for added peace of mind.

Automation Controller and Accessories

Easy, automated control of lighting, heating/cooling and security systems provides the increased comfort and convenience of a custom-made home environment. You'll also save on your utility bills by automatically controlling thermostat settings and light switches.

Central Vacuum

Install the built-in cleaning appliance that cleans your home and improves indoor air quality at the same time. A central vacuum system removes 100% of vacuumed dirt, dust mites, pollen, bacteria, dander and other allergens from your living area.
